Evaluate Your Fleet Management to Minimize the Blow from **COVID-19**

When a crisis occurs, it's important to know where your stuff is. AwareGPS is here to help. The COVID-19 pandemic took a hit on many service companies across the country, but it doesn't have to take your business out. Our GPS tracking tools allow you to know where your vehicles and equipment are when they are needed the most. Here are a few areas where asset and fleet management can minimize the blow from COVID-19.

Know Where Your Equipment is at All Times

The power of GPS technology is all in the details of what you are able to track and monitor. Be able to see when your vehicles are moving and where your equipment is being used at all times. Key features from AwareGPS allow you to do just that with ease.

Real-time Alerts

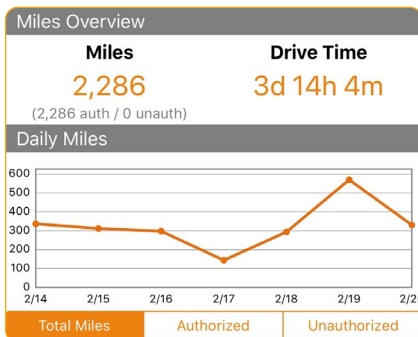

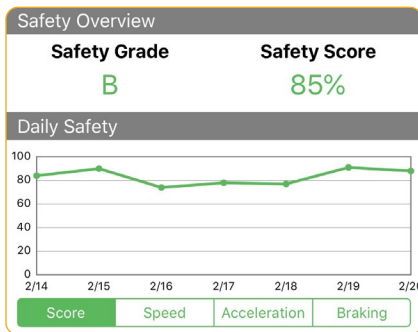

Get real-time alerts every minute when the vehicle is running and once an hour when the vehicle is shut off. Once the vehicle is in motion, AwareGPS allows you to see the direction and speed the vehicle is currently traveling and see the current address of the vehicle when it is parked.

	David's Car Vehicle's brakes were rapidly applied.	11:45 AM
	David's Car David's Car is travelling 36 in a 25 mph posted speed zone (heading SE).	10:24 AM
	David's Car Exited geofence work.	9:15 AM
	David's Car David's Car is in use at 9:14 AM, outside your authorized hours.	9:14 AM

Customize trigger alerts for a variety of events and thresholds

Detailed reports provide valuable insights to improve overall fleet performance

AwareGPS is proven to reduce fuel costs up to 20%

Alerts for Key Fleet Activity

Never worry about whether your drivers are reckless on the road or using a vehicle at inappropriate times. Receive up-to-date information on key driving events throughout a typical workday.

- Geofence alerts allow you to see when drivers enter or exit specifically marked areas on your company's personal map.
- Ensure that drivers are exhibiting safe driving habits by monitoring speeding, harsh braking, and rapid acceleration while on the job.
- Establish a productive work environment and be certain that drivers are using their time effectively with alerts for the first ignition of the day, excessive idling, and unauthorized vehicle usage.

Detailed Reporting

Data captured by your AwareGPS tracking device turns into detailed reports with valuable insights to improve overall fleet performance.

- Alerts can be filtered by date range, alert time, group, vehicle, and driver.
- Get only the most useful information with custom alerts for different users, monitoring specific drivers, vehicles, or groups.

Reduce Costs and Increase Revenue

A crisis can come out of nowhere and be a detriment to your business' finances. AwareGPS allows you to be prepared. Our GPS tracking technology can help reduce costs and increase revenue when you're in a pinch.

- Don't make the mistake of...
 - Not knowing how your drivers are behaving on the field
 - Not monitoring after-hours use
- With AwareGPS you can take control of...
 - Reducing fuel usage and costs
 - Halting the use of vehicles after authorized hours

Reduce Fuel Usage and Costs

Wasted fuel is wasted money. AwareGPS is proven to reduce fuel costs up to 20%, which is especially beneficial when conserving money and resources is a necessity. Easily find the source of excessive fuel use by:

- Tracking the miles each vehicle travels
- Identifying high rates of idling
- Reducing speeding

Stop Unauthorized Vehicle Use

Unnecessary wear and tear to your vehicle can add up in maintenance costs. Establish specific times or days of the week when drivers are allowed to use company vehicles. AwareGPS gives you the ability to:

- Set a schedule of authorized hours
- Receive alerts in real-time when vehicles are being used outside of those hours
- Replay driving details during unauthorized use

Deliver Better, Faster Service

Providing customers with what they want the most will help keep your business afloat during trying times. Using AwareGPS lets you serve more customers while improving your service through streamlining worker dispatch.

Efficient Dispatch

Keeping track of your employees while they're in the field all day going to multiple job sites is simplified with AwareGPS dispatch features.

- Locate vehicles that are closest to any service call to significantly cut response times
- Send conveniently located vehicles to customer sites by reviewing real-time traffic updates
- Keep an eye on how long your employees are spending at customer locations and identify problems well in advance

Create more accurate billing with a variety of reports including trips/miles, usage hours, stops, idle activity, and more

Monitor the maintenance history and schedule for each vehicle or piece of equipment

Quickly and easily locate any vehicle or asset while it's on the road or at a job site

Create geofences to get alerts when vehicles or equipment enters or exits areas you designate
